Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

This office action is in response to an amendment filed on June 17, 2006. The rejections for claims 1, 19, 20, 25-30 are applied for the same reasons as described in the last office action mailed on Dec 15, 2005. Applicant(s) should refer the stated office action for the detailed rejections for these claims.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claim 35 is rejected under 35 U.S.C. 102(e) as being anticipated by D'Souza (U.S. Patent number 6446218).

3. As per claim 35, D'Souza teaches (col. 7, lines 30-32) that if the fault tolerance level is below the predefined acceptable fault tolerance level, the method also includes searching for a

first suitable computer among the first plurality of computers to load another module of the software program.

Allowable Subject Matter

1. Claims 21-24, & 31-34 are allowed.
2. Claim 36-39 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

3. Applicant's arguments filed June 17, 2006 have been fully considered but they are not persuasive. As per Applicant's argument pertains to rejection of claims under double patenting, Applicant's arguments fail to comply with 37 CFR 1.111(b) because they amount to a general allegation that the claims define a patentable invention without specifically pointing out how the language of the claims patentably distinguishes them from the references.

As per rejection of claims 1, 19, 20, 25-30 under 35 U.S.C. 102(e) as being anticipated by D'Souza. Applicant alleges that D'Souza does not show or teach the features related to evaluating a measured wait time associated with at least one user interface event and selecting a fault tolerance scheme to improve the user perceived performance. Examiner contends that D'Souza teaches the stated features since D'Souza teaches (col. 7, lines 27-30) that his method includes ascertaining a fault tolerance level associated with the software program, ascertaining being ascertained by examining the status of the software modules running on the first plurality

of computers and if the fault tolerance level is below the predefined acceptable fault tolerance level, the method also includes searching for a first suitable computer among the first plurality of computers to load another module of the software program thereon. He also teaches the stated features at (col. 13, lines 37-43).

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
